

# Empowering Brilliance: Securing Jewellery Stores

MONITOREAL VIDEO  
SECURITY ASSISTANT

## THE CHALLENGE

Jewellery stores face persistent security challenges due to the high-value merchandise they house. Some of these include:

- **Theft and robbery** - armed attacks pose significant risks to the safety of staff and customers.
- **Shoplifting** - opportunistic thieves persistently attempt to steal smaller, easily concealable items.
- **After-hours burglaries** - can involve smashing windows, cutting through security bars, or bypassing alarms.
- **Access control** - to restricted areas within the store can protect merchandise and limit the risk of internal theft.

## OUR SOLUTION

Introducing our revolutionary AI-powered video security assistant, that specifically addresses the unique needs and challenges of jewellery stores. Here's why we stand out:

- **Camera flexibility** - seamlessly integrate with any popular security camera brand via ONVIF or RTSP, offering you the freedom to choose the best-fit cameras for your store.
- **Complete security integration** - connect new or existing intruder alarms, LED lights, gates, speakers, sirens, strobes, and more.
- **Proactive deterrence** - trigger connected accessories based on valid object detections and custom rules you control, allowing you to deter potential threats before they occur.
- **Round-the-clock professional support** - connect Monitoreal to monitoring center software for continuous professional services without relying on cloud-based infrastructure, ensuring your store's security is never compromised.

Ensure the safety of your employees, store and stock, from anywhere in the world

# Jewellery Store Scenario

Upgraded Using Modern AI Technology

## PROACTIVE SECURITY IN ACTION

Predict potential threats based on suspicious activity

Monitor the movement of staff, customers, and delivery personnel

Control access to restricted store areas, housing high-value stock

Trigger sirens and warnings before security threats on the property become incidents

## MAXIMIZE SITUATIONAL AWARENESS

- **Set multiple Regions of Interest (ROI)** for each camera, to focus on objects & areas that matter most.
- **Enable time schedules** for each rule or ROI, for precise control based on changing circumstances.
- **Customise scenarios** for awareness events, ie. vehicle detection, gate control, human presence outside working hours - all triggering alarms, strobes, and more to keep things in check.
- **Integrate with** monitoring stations, to ensure 24/7 professional response.

Overcome security challenges, cut costs, and enhance safety with Monitoreal! Take our advanced, comprehensive approach to safeguarding your jewellery store and maintaining a secure environment.
