

# Serenity and Security for Your Holiday Homes

MONITOREAL VIDEO SECURITY ASSISTANT

## Do you worry about

protecting your holiday home when you're not there? Concerned about:

**Break-ins and Thefts:** Holiday homes are often targeted due to their seasonal occupancy, making them vulnerable to burglaries.

**Vandalism:** Unoccupied homes can attract unwanted attention, resulting in potential damage such as broken windows and vandalised walls.

**Environmental Hazards:** Being away from the home means being unaware of fire hazards, water leaks, or other environmental concerns that could compromise the home's safety.

**Remote Monitoring:** Distance from the primary residence can make it challenging to maintain a close watch on the holiday home.

## Did you know

Monitoreal can help you with those issues and more?

**Detect 20+ Object Types** including humans, vehicle types, pets, wild animals and common accessories thanks to Monitoreal's AI technology.

**Get Instant Mobile Alerts** showing only the detections you care about courtesy of customisable settings. Use the MR app, Telegram, or other instant messaging.

**Deter Intruders & Avoid Threats** before they occur by creating tailored detection scenarios that trigger actions such as tripping alarms and turning on lights.

**Integrate Existing Equipment** you already own, including security cameras, alarms, smart lights, speakers, gates, strobes and more.

**Enjoy Data Privacy** and uninterrupted service as our system doesn't rely on the cloud to process video or alerts.

**One-Time Purchase** pricing model allows you to enjoy home protection indefinitely and get lifetime software updates.

THEN

## MAXIMIZE SITUATIONAL AWARENESS

- **Multiple Regions of Interest (ROI):** Configure your camera's focus to monitor areas that are most important to you, like entrances, driveways, back and side yards or pool areas.
- **Time-Sensitive Rules:** Apply schedules for each rule or ROI based on occupancy periods, ensuring you have the right security measures at the right times.
- **Custom Scenarios:** Configure alerts for specific situations, such as human presence detection during off-seasons to notify and autonomously respond to each situation.
- **24/7 Professional Monitoring:** Integrate with monitoring centers for continuous professional services, offering an additional layer of protection.
